

# Week 1 Assignment

*Umais Siddiqui*

*September 2, 2017*

## Mushrooms Dataset

### Step 1 Import Libraries

```
library(plyr)
library(RCurl)
```

```
## Loading required package: bitops
```

### Step 2 Reading from CSV file located in Github repo

In this step we will be reading the data from csv file in to a data frame and then renaming the columns in the data frame to more meaningful names.

```
url<-getURL("https://raw.githubusercontent.com/umais/DATA-607/master/Assignment1/agaricus-lepiota.data")
```

```
df <- rename(data.frame(read.csv(text=url,header=FALSE)),
              c(
                "V1"="classes",
                "V2"="cap_shape",
                "V3"="cap_surface",
                "V4"="cap_color",
                "V5"="Bruises"
              ))[,c(1:5)]
```

```
head(df)
```

```
##   classes cap_shape cap_surface cap_color Bruises
## 1      p         x         s         n         t
## 2      e         x         s         y         t
## 3      e         b         s         w         t
## 4      p         x         y         w         t
## 5      e         x         s         g         f
## 6      e         x         y         y         t
```

### Step 3 Replace Values in the columns and Display the data frame

In this step we will be replace the values of the data to have more menaingful values

```
revalue(df$classes, c("e" = "edible")) -> df$classes
revalue(df$classes, c("p" = "poisonous")) -> df$classes
revalue(df$cap_shape, c("b" = "bell")) -> df$cap_shape
revalue(df$cap_shape, c("c" = "conical")) -> df$cap_shape
revalue(df$cap_shape, c("x" = "convex")) -> df$cap_shape
revalue(df$cap_shape, c("f" = "flat")) -> df$cap_shape
revalue(df$cap_shape, c("k" = "knobbed")) -> df$cap_shape
```

```

revalue(df$cap_shape, c("s" = "sunken")) -> df$cap_shape
revalue(df$cap_surface, c("f" = "fibrous")) -> df$cap_surface
revalue(df$cap_surface, c("g" = "grooves")) -> df$cap_surface
revalue(df$cap_surface, c("y" = "scaly")) -> df$cap_surface
revalue(df$cap_surface, c("s" = "smooth")) -> df$cap_surface
revalue(df$cap_color, c("n" = "Brown")) -> df$cap_color
revalue(df$cap_color, c("b" = "Buff")) -> df$cap_color
revalue(df$cap_color, c("c" = "Cinnamon")) -> df$cap_color
revalue(df$cap_color, c("g" = "Gray")) -> df$cap_color
revalue(df$cap_color, c("r" = "Green")) -> df$cap_color
revalue(df$cap_color, c("p" = "Pink")) -> df$cap_color
revalue(df$cap_color, c("u" = "Purple")) -> df$cap_color
revalue(df$cap_color, c("e" = "Red")) -> df$cap_color
revalue(df$cap_color, c("w" = "White")) -> df$cap_color
revalue(df$cap_color, c("y" = "Yellow")) -> df$cap_color
revalue(df$Bruises, c("t" = "Yes")) -> df$Bruises
revalue(df$Bruises, c("f" = "No")) -> df$Bruises
df

```

##	classes	cap_shape	cap_surface	cap_color	Bruises
## 1	poisonous	convex	smooth	Brown	Yes
